Jack used the number line below to solve $427 - 316$. Find his error. Then write a letter to Jack telling him what he did right, and what he should do to fix his mistake.

Don't feel bad. I have a Bachelor of Science Degree in Electronics Engineering which included extensive study in differential equations and other higher math applications. Even I cannot explain the Common Core Mathematics approach, nor get the answer correct. In the real world, simplification is valued over complication. Therefore,

$$\begin{array}{r} 427 \\ - 316 \\ \hline 111 \end{array}$$

The answer is solved in under 5 seconds - 111. The process used is ridiculous and would result in termination if used.

Sincerely,
Frustrated Parent
